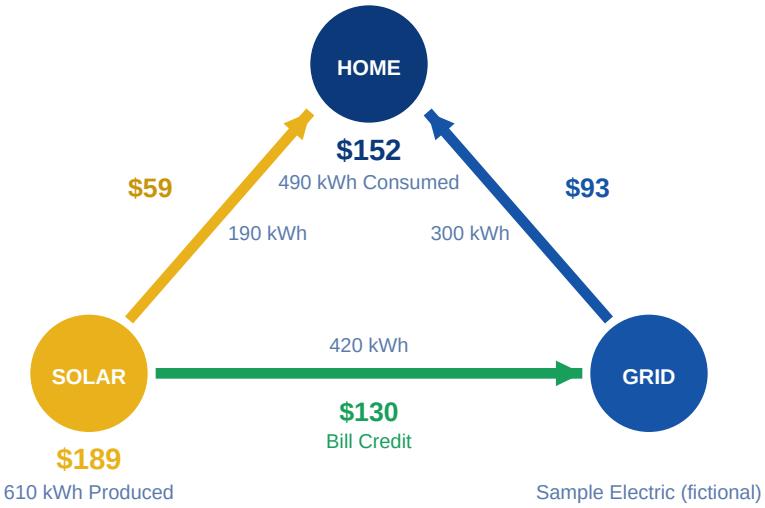
My Home Energy Report Light

Oct 1 - Oct 31, 2026 · 31 days · Sample Electric (fictional)

SOLAR	SOLAR PRODUCED VS. HOME USE	ENERGY INDEPENDENCE
Working	124%*	39%

Home Energy Usage

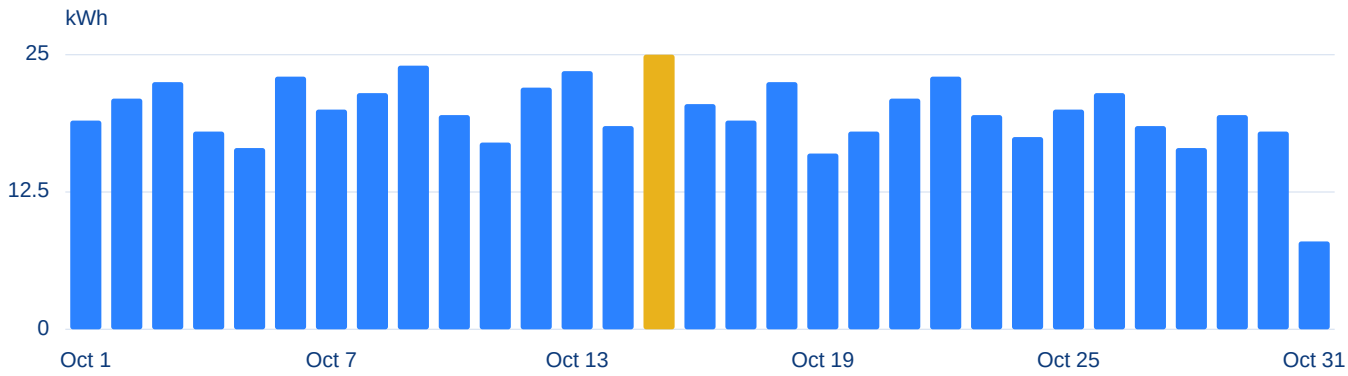
Your home used **$152** of energy. Solar covered all of it: **$59** in real-time usage, plus a **$130** Bill Credit that offset the **$93** from the grid, with **$37** left over toward your annual true-up.



Home Use	**$152**	490 kWh
Solar Real-Time Usage	**- $59**	190 kWh
Bill Credit	**- $130**	420 kWh
Net Energy Credit	**= $37**	120 kWh
Solar Produced	**$189**	610 kWh
Grid Energy	**$93**	300 kWh

Valued at your Sample Electric (fictional) energy rate on this bill, $0.3100/kWh. Solar real-time usage = solar produced minus solar sent to the grid.

Solar performance



Produced 610.0 kWh · 31 of 31 days recorded.

True-up status

Month 7 of 12 · settles Mar 31, 2027 · balance to date $86.10

Amount due this bill: **$12.40**, fixed monthly charges. Energy credits and charges go to the annual true-up.

Home Energy Monitoring and a true-up forecast · automatic, every bill · myhomeenergyreport.com

* Home use is approximate: solar produced minus energy sent to the grid, plus energy drawn from the grid. This report is not a replacement for your solar monitoring.
